### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: ✓

The primary reason for allowance of claims 1-4, 6-10, 24, 25, and 29-31 is the inclusion of a processing circuitry configured to control storage of the data using the memory to provide a history comprising a plurality of values of the at least one environmental condition to which the image forming device has been exposed at a plurality of different moments in time. This is found in all of claims 1-4, 6-10, 24, 25, and 29-31, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 11, 14, 15, and 32 is the inclusion of a method of communicating data regarding the at least one environmental condition externally of the image forming device; receiving a request within the image forming device from a source external of the image forming device, and the communicating comprises communicating responsive to the receiving and comprising storing data regarding the at least one environmental condition using the consumable. This is found in all of claims 11, 14, 15, and 32, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 16, 18-20, 27, and 33 is the inclusion of the method of analyzing a data regarding the at least one environmental condition after the receiving the data regarding the at least one environmental condition from the image forming device; and to determine a quantitative parameter for the at least one environmental condition for testing other image forming devices. This is found in all of claims 16, 18-20, 27, and 33, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 23 and 35 is the inclusion of an interface configured to communicate the data indicative of the at least one environmental condition externally of the image forming device; and wherein the image engine is configured to use a consumable to form the hard images, and the interface comprises a memory of the consumable. This is found in all of claims 23 and 35, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 28 is the inclusion of accessing a history comprising data indicative of at least one environmental condition to which at least one second image forming device has been exposed; determining at least one testing criteria responsive to the accessing of the history; and testing the first image forming device using the testing criteria after the determining. This is found in of claim 28, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 36 is the inclusion a processing circuitry configured to control storage of the data using the memory to provide a history of the at least one environmental condition to which the image forming device has been exposed; and wherein the image engine is configured to use a consumable to form the hard images, and the interface comprises a memory of the consumable. This is found in of claim 36, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 37 is the inclusion a processing circuitry configured to control storage of the data using the memory to provide a history of the at least one environmental condition to which the image forming device has been exposed; and wherein the processing circuitry is configured to control outputting of the

Art Unit: 2852

history externally of the image forming device. This is found in of claim 37, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 38 is the inclusion of a processing circuitry configured to control storage of the data using the memory to provide a history of the at least one environmental condition to which the image forming device has been exposed; and the memory is configured to store the history prior to the image forming device being implemented for the first time to form hard images. This is found in of claim 38, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
